

Adobe Student File Transfer

Makes it easy for students and recent graduates to copy Adobe files to personal accounts.

With Student File Transfer from Adobe, your students and recent graduates can easily copy their Adobe files from school-assigned accounts to new or existing Adobe personal accounts.

With just a few clicks, they will be able to have ongoing access to their files. By migrating their files, they will be able to showcase their work to future employers long after graduation.

Here is how their files can be copied from school accounts to personal accounts:

- Student File Transfer must be enabled in the Admin Console.
- Students and graduates must have access to their school-assigned accounts.
- Students and recent graduates must be provided with the following link so they can follow the steps to copy their files: graduation.adobe.com.

Here are a couple [email templates](#) you can customize to let your students, recent graduates, and faculty know about the migration opportunity.
